Operations & Management

The United States Department of Transportation (USDOT) has initiated a effort to develop programs, policy and, if appropriate, funding in support of the operation and management of transportation systems and facilities at the local and state levels. Ms. Susan Petty of USDOT will describe their goals/objectives and present their findings thus far. European and American cities will describe their experiences, identify needs and suggest areas of further study to help shape United States policy development in this area.

9:15a.m. - 12:15 p.m. Third Session:

Institutional Relationships Across Organizational Boundaries

The growing proliferation of traffic management centers (TMCs) at all levels of non-federal government in large urbanized areas, often linked by fiber optic networks, has raised serious issues about extending the benefits of traffic management across jurisdictional borders, sharing facilities, accessing private networks through capacity set-asides and coordination operational responsibilities. Discussion will be facilitated by presentations of recently completed case studies of TMC coordination and fiber optic sharing and cooperative arrangements.

9:15 a.m. - 10:30 a.m.: Plenary Session:
